

Call for Papers

Mobile and Wireless Networks Symposium

Symposium Co-Chairs

- Chin-Tser Huang, University of South Carolina, USA, email: huangct@cse.sc.edu
- Nizar Zorba, Qatar University, Qatar, email: nizarz@qu.edu.qa
- Chun-Hung Liu, Mississippi State University, USA, email: chliu@ece.msstate.edu
- Carla Fabiana Chiasserini, Politecnico di Torino, Italy, email: chiasserini@polito.it

Scope and Motivation

The Mobile and Wireless Networking Symposium aims to serve as an international forum for experts, researchers, and practitioners from academia, industry, and government to exchange new ideas and results on research and development, as well as to promote and accelerate standardization, applications, and services of current and future wireless networks. This symposium invites contributions and participation from both academic and industry researchers working in the area of wireless networking technologies, services, architectures, and protocols. The overall goal is to present the latest snapshot of the ongoing research, as well as to shed further light on future directions in mobile and wireless networking systems. Authors are invited to submit papers presenting novel technical studies as well as position and vision papers comprising hypothetical/speculative scenarios.

Topics of Interest

The Mobile and Wireless Networks Symposium seeks original contributions in the following topical areas, plus others that are not explicitly listed but are closely related:

- 5G/6G networks and beyond
- Reconfigurable wireless networks
- Integration of terrestrial and non-terrestrial networks
- User cooperation and incentive techniques in wireless networks
- Small cell networks
- Wireless mesh networks
- Vehicular wireless networks
- UAV networks
- Underwater wireless networks
- Delay-tolerant wireless networks
- Software-defined wireless networks
- Wireless multimedia networks
- mmWave and Terahertz wireless networks

- Free-space optical networks
- Opportunistic wireless networks
- Network slicing on wireless networks
- Inter-networking of wireless heterogeneous networks
- Energy harvesting and self-sustainable networks
- Dual-powered cellular networks
- Green mobile and wireless networks
- Artificial Intelligence (AI)/Machine Learning (ML)-based wireless networking technologies
- Wireless network virtualization technologies
- Wireless edge computing, fog computing, and cloud computing
- Pervasive and wearable computing and networking technologies
- WLAN, WPAN, and other home/personal networking technologies
- Coexistence of heterogeneous wireless networks
- Device-to-device communications
- Cell-free wireless networks
- Machine-to-machine communications
- Network architectural design
- Medium access control
- Routing and path selection
- Flow and congestion control
- Fault-tolerance and traffic engineering
- Topology control
- Mobility management
- Resource management
- Power management
- Cross-layer design and optimization
- Fault-tolerance and reliability testbeds and deployment of wireless networks
- Standardization activities of emerging wireless technologies

Important Dates

Paper Submission: 11 October 2022

Notification: 18 January 2023

Camera Ready and Registration: 15 February 2023

Important Note

The authors of selected papers from this symposium will be invited to submit an extended version of their work for fast-track review and possible publication in the IEEE Open Journal of the Communications Society.

How to Submit a Paper

All papers for technical symposium should be submitted via EDAS. Full instructions on how to submit papers are provided on the IEEE ICC 2023 website: <https://icc2023.ieee-icc.org/>
